1. The new EU General Data Protection Regulation (GDPR)

On May 25, 2018 the new EU General Data Protection Regulation (GDPR) enters into force. For that reason we would like to inform all NMA's who are already registered to our IISHF Communication Letters and other interested parties about our responsible handling of personal data.

With our IISHF Communication Letters we usually give an overview about our activities. By registering for our newsletter, we process your first name, surname and e-mail address. Data is collected for the sole purpose of distributing the newsletter and is not shared with and/or transmitted to third-party organizations. Data will be retained until you revoke your consent. Following a revocation your data will be deleted immediately. You may revoke or deregister from the IISHF Communication Letters at anytime. If you wish to exercise your right to data information, correction, deletion, processing restriction, processing contradiction and transferability, please contact us via office@iishf.com.

For a description of the General Data Protection Regulation (GDPR) please read for example the description on Wikipedia https://en.wikipedia.org/wiki/General_Data_Protection_Regulation. Of relevant points the following is relevant in this context:

1. A processor of personal data must clearly disclose what data is being collected and how, why it is being processed, how long it is being retained, and if it is being shared with any third-parties.
2. The regulation applies if the data controller (an organisation that collects data from EU residents), or processor (an organisation that processes data on behalf of a data controller like [cloud service providers](#)), or the data subject (person) is based in the EU. Under certain circumstances, the regulation also applies to organisations based outside the EU if they collect or process personal data of individuals located inside the EU.
3. According to the [European Commission](#), personal data is any information relating to an individual, whether it relates to his or her private, professional or public life. It can be anything from a name, a home address, a photo, an email address, bank details, posts on [social networking websites](#), medical information, or a computer's [IP address](#).
