### What is skaterhockey?

Skaterhockey is a fast paced and exhilarating sport not unlike ice hockey with a few marked differences. The game is extremely intense due to a smaller rink compared to ice hockey; this puts great demand on the players both technically and physically.

Aspects of the game include hard hits and brilliant individual moves that will leave you amazed. Showmanship and high spirits is part of this growing sport where speed and balance combines with team-effort to bring you great high intensity games.

### Rollerskates and sports.

Skaterhockey is like other types of rollerskating sports among the fastest growing in the world. Along side skaterhockey, sports as different as speedskating, roller derby, aggressive, figureskating and Roll ball are all performed in rollerskates.
